

The award-winning McCloskey 407 screener leads the way in trommel screen innovation. The world's most efficient compact trommel screener best suits small topsoil screening jobs with production between 20 and 50 yards per hour. The patented radial conveyor rotates 180° for multiple stockpiling. The ability to screen and stockpile material saves you time and money.

Features, Benefits, and Options

- Patented remote controlled 180° radial stockpiling conveyor
- Variable discharge height for maximum stockpiling flexibility
- Drum exchange system for maximum versatility
- Compact for size-restricted areas
- Folds and unfolds hydraulically
- Ready to use within minutes of arrival on site
- Easily transported with a five ton truck (no permits required)

Specifications (407 with radial conveyor)

Engine:	50 HP (37 kw) Caterpillar diesel engine
Hopper:	8 ft. x 3 ft. 2 in (2.4 m x 0.92 m)
Trommel Screen:	4 ft. diameter x 7 ft. long (1.22 m x 2.13 m)
Weight:	13,869 lbs (6,290 kgs)
Transport Height :	10 ft. 6 in. (3.2 m)
Transport Length:	26 ft. 10 in. (8.17 m)
Transport Width:	6 ft. 10 in. (2.08 m at axles)

Specifications vary with screener options and are subject to change without notice.
